

Progress Report

Outline

- [Task 1] NoSQL - MongoDB
 - Problems
 - Why MongoDB?
 - Comparison
 - Solution in MongoDB
 - Demo
- [Task 2] Flutter APP
- On-going Report

NoSQL - MongoDB

- Not Only SQL
 - NoSQL are databases that store data in a format other than relational tables.
- The Development of Big Data
 - Rapid : Denormalization
 - Flexible : Schemaless
 - Scaling : Sharding
- Eventual consistency

Issues about AIR

- The current schema design of the database leaves plenty of room for improvement.
 - Multiple joins in one query
 - 同個Table重複判斷欄位

Why MongoDB?

- The current schema design of the database leaves plenty of room for improvement.
 - Multiple joins in one query
 - 同個Table重複判斷欄位
